PIPELINE ANALYTICS live from your finished jobs

Session timeline · 3 runs across 24s

13 of 16 jobs in scope never started — bars cover engine runs only (startedAt → measured wall time)

Runtime by stage · 3 completed runs · 24s summed

heaviest: CTF Estimation · 53.4%

CTF Estimation	53.4%	×1	~13s	13s
Motion Correction	42.6%	×1	~10s	10s
Import Movies / Micro…	4.1%	×1	~1s	1s

share of summed wall clock · ~median · total — bars cover completed runs (a live run has no end yet)

Critical path · 3 steps · 24s span

ends with: CTF Estimation 1

1 Import Movies 1 — 1s
↳ overlapped 1s with upstream
2 Motion Correction 1 — 10s
↳ waited 0s after upstream finished
3 CTF Estimation 1 — 13s

the chain the pipeline's finish actually waited on · ran 24s − overlapped 1s = 24s span — a live run has no end yet, so it waits outside the chain

JOBS · 16 · NEWEST FIRST

Particles Consumer (t978) Idle Main
not started

Classes Consumer (t978) Idle Main
not started

3D Classification 1 (t978) Completed Main
3D classification completed: 1200 particles into 3 classes over 2 iterations (the t978 select-rider world's class3d face)

2D Classification 1 (t978) Completed Main
2D classification completed: 1200 particles into 4 classes over 2 iterations (the t978 select-rider world's class2d face)

Cancelled Diagnosis Face (t976) Failed Main
the run ended in an external cancellation SLURM recorded in its own words (*** CANCELLED AT … *** — an operator scan

Negative Diagnosis Face (t972) Failed Main
relion_refine_mpi was cancelled by the partition's 24-hour walltime (SLURM: DUE TO TIME LIMIT) mid-iteration 7 of 25 —

JOBS · 16 · NEWEST FIRST

Custom Error Face (t995) Failed Main
the wrapper died before RELION started — the modulefile named a RELION build the node no longer has (bash answered

Rounds Face (t989) Idle Main
not started

Continue Face (t988) Idle Main
not started

Idle Shape Face (t987) Idle Main
not started

Failed Diagnosis Face (t970) Failed Main
motioncor2 exited 137 — CUDA error: out of memory on GPU 0; the CPU retry was killed by the kernel's OOM killer (the t

Peek Stress Bench (t966) Completed Main
RELION motioncorr finished (the t966 peek-stress bench): 2100 micrographs motion corrected — the workdir carries a w

Remote Ledger Door (t963) Completed Main
REMOTE[cryo@localhost · relion/5.0.1]: motion corrected, 650 micrographs · 650 still on cluster

CTF Estimation 1 Completed Main
REMOTE[cryo@127.0.0.1 · relion/5.0.1]: CTF estimated for 6 micrographs

Motion Correction 1 Completed Main
REMOTE[cryo@127.0.0.1 · relion/5.0.1]: motion corrected, 6 micrographs · 6 still on cluster

Import Movies 1 Completed Main
6 movies imported from Cluster · headers (3 ection MRCs 64×64 (mode 1) — motion-corrected micrograph
