Motion Correction 1

Motion Correction · completed · workspace “Main” · showing Engine log

printed Oct 30, 2026

Motion Correction 1 ● Completed

Motion Correction drinks ● movies ● micrographs · pours ● micrographs **6 micrographs** 10s created 9h 11m ago

cryo@127.0.0.1:3022 `relion/5.0.1` **Ran on the cluster · Slurm COMPLETED · 7.0s**

`staged 166ms · synced 181ms · 3 file(s) back`

6 image file(s) stayed on the cluster — motioncorr jobs sync metadata only under the key-files policy (STAR, logs and plots come home; image stacks never do, whatever their size). They are listed in this job's Results — open or download one to fetch it on demand — or switch the connection's sync policy to "everything" to bring them home

6 files still on the cluster — Results → Bring home all brings them all in one click.

```
