2D Classification 1 (t978) Completed

2D Classification drinks ● particles · pours ● particles ● references2d 1,200 particles 4 classes 12s

created 3h 5m ago

Class snapshots 1 round 1,200 particles assigned

iteration 002 · every class average of this round in one sheet

class grid · latest completed round (it 002) — occupancy from its data star

Pick the classes worth keeping — the next job runs on exactly those particles (no subset-selection step)

AI verdict it.2

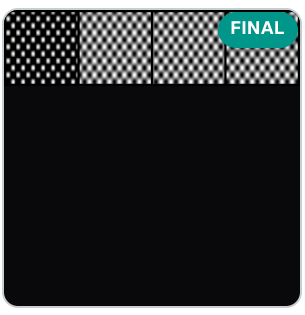

4 reject

~~class 1~~ reject · ~~class 2~~ reject · ~~class 3~~ reject · ~~class 4~~ reject

All four classes should be rejected as they contain no evidence of the target macromolecule. The images are dominated by artifacts (crystalline patterns in classes 1 and 3) or represent empty/noise classes (classes 2 and…
