Motion Correction 1 ● Completed

Motion Correction drinks ● movies ● micrographs · pours ● micrographs **6 micrographs** 10s created 9h 10m ago

cryo@127.0.0.1:3022 `relion/5.0.1` **Ran on the cluster · Slurm COMPLETED · 7.0s**

`staged 166ms · synced 181ms · 3 file(s) back`

6 image file(s) stayed on the cluster — motioncorr jobs sync metadata only under the key-files policy (STAR, logs and plots come home; image stacks never do, whatever their size). They are listed in this job's Results — open or download one to fetch it on demand — or switch the connection's sync policy to "everything" to bring them home

6 files still on the cluster — Results → Bring home all brings them all in one click.

6

MICROGRAPHS CORRECTED

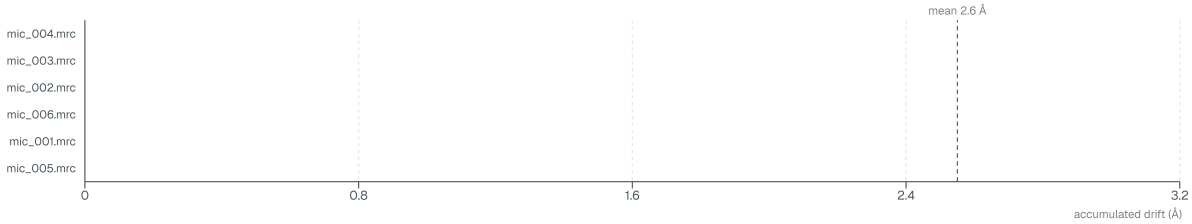

Completed · 10s

REMOTE[cryo@127.0.0.1 · relion/5.0.1]: motion corrected, 6 micrographs — 6 image file(s) stayed on the cluster — motioncorr jobs sync metadata only under the key-files policy (STAR, logs and plots come home; image stacks never do, whatever their size). They are listed in this job's Results — open or download one to fetch it on demand — or switch the connection's sync policy to "everything" to bring them home

Corrected micrographs 6

Accumulated motion 6 micrographs · mean 2.6 Å

DRIFT TRIAGE · early-frames dominate (the stage settles late) · worst `mic_004.mrc` at 3.1 Å (pack mean 2.6 Å)

teal = early frames (stage settling) · amber/rose = late frames (beam-induced) · rose bar = outlier at mean + 2σ

Motion micrograph board · 6 micrographs · 1 offender, 1 watch

mic_004 **3.1 Å** early 1.9 · late 1.2 Å	mic_003 **2.8 Å** early 1.7 · late 1.1 Å	mic_002 **2.5 Å** early 1.5 · late 1.0 Å
mic_006 **2.5 Å** early 1.5 · late 1.0 Å	mic_001 **2.2 Å** early 1.3 · late 0.9 Å	mic_005 **2.2 Å** early 1.3 · late 0.9 Å

offenders ≥ 3.0 Å (p90) · watch ≥ 2.7 Å (p75) — lines are this run's own distribution

TIMELINE

Created	Started	Completed
04:41:16 AM	05:47:21 AM	10s
9h 10m ago	8h 4m ago	wall time

The journal records what happens here — edits, notes and runs appear as they happen (history begins when this browser first saw the job).

- Started — 8h 4m ago
- Created — 9h 10m ago

PARAMETERS complete · 24 settings

Parameter presets 0 for Motion Correction

I/O

11 params

Input movies STAR file:	–	*First frame for corrected sum:*	1
Last frame for corrected sum:	-1	*Pre-exposure (e/A2):*	0
EER fractionation:	32	*Write output in float16?*	Yes
Save images for denoising?	No	*Do dose-weighting?*	Yes
Save non-dose weighted as well?	No	*Save sum of power spectra?*	Yes
Sum power spectra every n frames:	4		

MOTION

13 params

Patch X	5	Patch Y	5
B-factor	150	Dose per frame	1.28 e⁻/Å²
Group frames:	1	*Binning factor:*	1
Gain-reference image:	–	*Gain rotation:*	No rotation (0)
Gain flip:	No flipping (0)	*Defect file:*	–
Use RELION's own implementation?	Yes	*MOTIONCOR2 executable:*	–
Other MOTIONCOR2 arguments	–		

INPUTS CONSUMED

→ `particles` import_hhpn7gmk/micrographs.star

OUTPUTS AT A GLANCE

6 maps & images	1 STAR tables	2 logs & text	0 plots

COMMAND LINE recorded at launch

```
/home/z/my-project/services/mock-cluster/fs/opt/bin/relion_run_motioncorr --i
import_hhpn7gmk/micrographs.star --o motioncorr_24kj1mzx/ --use_own --j 4 --float16 --bin_factor 1 --
bfactor 150 --dose_per_frame 1.28 --patch_x 5 --patch_y 5 --grouping_for_ps 3 --dose_weighting --gpu 0
```

workdir /home/z/my-project/data/relion/cmvuhirhq0000obuvm6flflqf/motioncorr_24kj1mzx
